

# Aarogya Bikram Thapa

Bharatpur, Nepal | [thapaaarogyabikram@gmail.com](mailto:thapaaarogyabikram@gmail.com) | [linkedin.com/in/aarogya-bikram-thapa-ab63b6371](https://linkedin.com/in/aarogya-bikram-thapa-ab63b6371) | [github.com/aar0gya](https://github.com/aar0gya)

## EDUCATION

### International School of Management and Technology

*Bachelor of Science in Computing, University of Sunderland*

Bharatpur, Nepal

*Sept 2022 – Nov 2025*

- Graduation: 2025 — GPA: 3.6/4.0
- Relevant Coursework: Data Structures & Algorithms, Database Systems, Software Engineering, Web Development, Mobile Application Development, Computer Networks, Operating Systems

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, Java, HTML/CSS, SQL, C++

**Frontend:** React.js, Next.js, Tailwind CSS, Material-UI, Bootstrap, Figma, Adobe XD

**Backend:** Node.js, Express.js, REST APIs, MongoDB, PostgreSQL, MySQL, Firebase

**Tools & Technologies:** Git, GitHub, Render, Vercel, Postman, Webpack, npm

**Mobile Development:** React Native, Flutter, Expo

**Design:** UI/UX Design, Wireframing, Prototyping, Responsive Design, Accessibility Standards

## EXPERIENCE

### Freelance Web Developer

Jan 2023 – May 2024

*Self-Employed*

*Remote*

- Delivered 15+ custom websites for clients across e-commerce, education, and service industries
- Designed and implemented responsive UI/UX solutions, achieving 95% client satisfaction rate
- Managed project timelines, client communications, and deployments using modern CI/CD practices

## PROJECTS

### Stock News Sentiment Analysis | *Python, Pandas, NLTK, Matplotlib, Streamlit*

- Analyze the real-time sentiment of stock market news using Python, FinViz scraping, and VADER sentiment analysis.
- Computes daily average sentiment per ticker.
- Displays interactive tables and bar charts in a web browser.

### Mobile Wallet App | *React Native, Nodejs, Redis, Postgresql, Neon, Clerk*

- Runs on iOS Android
- Email-based login signup (6-digit verification code) using Clerk
- Structured full-stack communication between mobile → backend → database

### Fake News Prediction | *Python, NLP, Machine Learning, Sentiment Analysis, Hybrid-AI*

- This project is designed as both a useful misinformation analysis tool and a showcase of full-stack machine learning engineering, featuring a polished UI, robust deployment design, and hybrid inference system.
- Support for multiple languages.
- Misinformation timeline visualizations.

### Real-Time Chat Application | *Socket.io, React, Express, MongoDB, Nodejs, Full Stack*

- Engineered real-time messaging and active responses.
- Implemented end-to-end encryption and JWT authentication for secure communications
- Optimized WebSocket connections to handle 100+ concurrent users efficiently

## ACHIEVEMENTS & LEADERSHIP

**Certifications:** Computer Systems Engineer, University of Sunderland
