PROFESSIONAL SUMMARY

Highly motivated **Computer Systems Engineering graduate (University of Sunderland)** with strong experience in **full-stack development, machine learning, mobile applications, and cloud-based systems**. Passionate about building **real-world, user-centered applications** that combine clean architecture, performance, and modern engineering practices.

Proficient in **Java, Python, JavaScript, TypeScript, and Dart**, with hands-on experience developing applications using **React, Node.js, Express, React Native, Flutter, Firebase, MongoDB, PostgreSQL, and cloud platforms**.

Driven by curiosity, continuous learning, and building impactful solutions through software.

CORE TECHNICAL SKILLS

Programming Languages

Java • Python • JavaScript • TypeScript • Dart • C#

Frameworks & Libraries

React.js • React Native • Node.js • Express.js • NLTK • Pandas • NumPy • Flutter • Socket.io

Databases

MongoDB • PostgreSQL • Firebase Realtime DB & Firestore • SQL

Tools & Platforms

Git • GitHub • Cloudinary • Firebase Auth • Postman • RESTful APIs • Android Studio

Other Competencies

Software Architecture • API Development • Real-time Communication (Socket.IO) • Data Processing • UI/UX Principles • Mobile App Development • Machine Learning Fundamentals

PROJECT EXPERIENCE

Fake News Prediction — Machine Learning Application

Python | NLP | ML | Pandas | NumPy

- Built an end-to-end machine learning system that detects **fake vs real news** using NLP and a hybrid model architecture.
 - Implemented text preprocessing, tokenization, sentiment scoring, and classification pipelines.
 - Designed dashboard-ready output suitable for analytics and real-world integration.
-

Stock News Sentiment Analysis — Finance AI Tool

Python | NLTK VADER | Web Scraping | Pandas | Matplotlib

- Developed a Python tool that scrapes stock-related news, processes sentiment with VADER, and visualizes trends.
 - Extracts real-time market signals to support basic financial decision-making.
 - Automated pipeline with clean modularization.
-

Chat App — Real-Time MERN Messaging Platform

React | Node.js | Express | MongoDB | Socket.io | Cloudinary

- Built a full real-time chat application with authentication, profile management, theme customization, and secure messaging.
 - Integrated Cloudinary for storing media files and user avatars.
 - Designed scalable backend with Socket.IO for event-driven communication.
-

React Native Wallet App — Personal Finance Tracker

React Native | Node.js | Express | PostgreSQL | Authentication

- Created a mobile application enabling users to track income, expenses, and financial logs in real time.
 - Developed backend APIs for category management, secure authentication, and transaction storage.
 - Designed clean, responsive mobile UI with smooth navigation.
-

Meal-Mate — Android Meal Planner App

Java | Android Studio | Firebase

- Built an Android application that assists users with meal planning, grocery tracking, and recipe management.
 - Implemented authentication using Firebase Auth and database storage via Firestore.
-

Flutter Fitness Tracker

Flutter | Dart

- Developed a cross-platform fitness tracking app for workout logging and progress analysis.
 - Designed UI with Material Design principles and smooth user experience.
-

Bank Management System (.NET Desktop App)

C# | .NET Framework | Windows Forms | SQL

- Built a desktop banking system for managing accounts, transactions, and authentication workflows.
 - Designed an intuitive UI with secure CRUD operations.
-

EDUCATION

BSc (Hons) Computer Systems Engineering

University of Sunderland — Completed

- Strong foundation in Software Engineering, Databases, Algorithms, and System Architecture
 - Hands-on labs and applied project work in engineering environments
-

STRENGTHS & SOFT SKILLS

- Strong Problem-Solving Mindset
 - Agile & Self-Driven Learner
 - Clean Code Practices & Documentation
 - Adaptability to New Technologies
 - Team Collaboration & Communication
-

PERSONAL PROJECTS & CONTRIBUTIONS

- 160+ GitHub contributions in the last year
 - Actively building projects in **AI**, **mobile development**, and **full-stack apps**
 - Learning advanced backend design, security best practices, and cloud services
-

INTERESTS

AI tools • Mobile Applications • Machine Learning • Real-time communication • Data engineering • Modern UI/UX
